| Fabricant                         | IXYS Corporation                              |
| La description                    | BRIDGE RECT 3 PHASE 1.2KV BR-5                |
| Catégorie                         | Produits semi-conducteurs discrets > Diodes - |
| État de la pièce                  | 2809 pcs Stock                                |
| Tension - Inverse de crête (max)  | 1200V                                         |
| Tension - directe (Vf) (max) @ Si | 1.09V @ 40A                                   |
| La technologie                    | Standard                                      |
| Package composant fournisseur     | PWS-C                                         |
| Séries                            | -                                             |
| Emballage                         | Bulk                                          |
| Package / Boîte                   | PWS-C                                         |
| Température de fonctionnement     | -40°C ~ 150°C (TJ)                            |
| Type de montage                   | Chassis Mount                                 |
| Type de diode                     | Three Phase                                   |
| Courant - fuite, inverse à Vr     | 100µA @ 1200V                                 |
| Courant - Rectifié moyenne (Io)   | 140A                                          |
