| Caractéristiques               |                                              |
|--------------------------------|----------------------------------------------|
| Modèle de produit              | MCP100T-270I/TT                              |
| Fabricant                      | Micrel / Microchip Technology                |
| La description                 | IC SUPERVISOR ACTIVE LOW SOT23-3             |
| Catégorie                      | Circuits intégrés (CI) > PMIC - Superviseurs |
| État de la pièce               | 5438 pcs Stock                               |
| Tension - seuil                | 2.625V                                       |
| Type                           | Simple Reset/Power-On Reset                  |
| Package composant fournisseur  | SOT-23-3                                     |
| Séries                         | -                                            |
| réinitialiser Timeout          | 150 ms Minimum                               |
| Réinitialiser                  | Active Low                                   |
| Emballage                      | Tape & Reel (TR)                             |
| Package / Boîte                | TO-236-3, SC-59, SOT-23-3                    |
| Sortie                         | Push-Pull, Totem Pole                        |
| Température de fonctionnement  | -40°C ~ 85°C (TA)                            |
| Nombre de tensions surveillées | 1                                            |
| Type de montage                | Surface Mount                                |
|                                |                                              |
